**ANSELL WINS UK CROWN COMMERCIAL SERVICE FRAMEWORK AGREEMENT
FOR THE PURCHASE OF TRELLECHEM® VPS CV-ET CHEMICAL PROTECTIVE SUITS**

16 June 2015, Trelleborg, Sweden - Ansell, a global leader in protection solutions, today announces that a four-year framework agreement has been established between the UK Crown Commercial Service (CCS) and Ansell for the purchase of TRELLECHEM® VPS CV-ET gastight suit. The framework agreement will be available to the UK emergency services and other public sector organizations.

“The CCS framework agreement is a break-through for Ansell and gastight re-usable suits in the UK market”, says François le Jeune, Senior Vice President Business Development and Transformational Initiatives at Ansell. “We have fought long and hard to establish the gastight re-usable suit for first responder customers in the UK market and winning the CCS framework tender is proof of this concept.”

Ansell competed in an open tender process for the CCS Framework in 2014. The tender process included detailed product trials, evidence of test methods and various certification requirements, along with the official tender bidding. One of the key requirements for competing suits was MIST, or Man-In-Simulant Test, where sulphur mustard (high-end warfare agent) was used to test and evaluate the penetration and permeation resistance for the complete ensemble.

Trellechem VPS CV-ET is a gastight chemical protective suit with excellent chemical resistance and durability, intended for use by both first responder hazmat teams as well as high-end industrial users. It is certified to the toughest standard in Europe and with an extensive reference list, it is one of the most popular suits in the Trellechem gastight suit range. The garment material consists of a well-proven combination of rubber and a multilayer chemical barrier and provides excellent chemical protection for +8 hours against a wide range of chemicals, as well as great abrasion and flame resistance properties.

The Trellechem VPS CV-ET suit fulfills European standards; EN 943-2/ET, EN 943-1, EN 1073-2, EN 14126 and SOLAS.
